DETAILED ACTION

1. Claims 34,36-40 are pending.

Claim Rejections - 35 USC § 103

2. The rejection of record has been dropped as applicant's remarks are persuasive.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 34,36-40 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 19 of U.S. Patent No. 6214865.
4. Claims 34,36-40 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 22-33 of U.S. Patent No. 6653341.

For above paragraphs 3,4 - although the conflicting claims are not identical, they are not patentably distinct from each other because generically disclose USP 865 (claim 19) and USP 341 (claims 22-33) teach the instantly claimed composition and its use to treat tumors.

One of ordinary skill in the art would thus be motivated to prepare compositions under the USP 865 (claim 19) and USP 341 (claims 22-33) genus in order to obtain additional beneficial antitumor agents. Also, one of ordinary skill in the art would be motivated to prepare compounds structurally similar to those of USP 865 (claim 19) and USP 341 (claims 22-33) in the expectation of obtaining a useful compound to treat tumors as compounds structurally similar in structure are expected to have similar properties. The level of skill in the art is further reflected in *In re Lohr* 137 USPQ 548 at 549 (CCPA 1963), and in *In re Payne* 204 USPQ 249 at 254 (CCPA 1979).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 38-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims as now presented contain new matter. Ex parte Grasselli 231 USPQ 393 (Bd. App 1984). It is clear from this decision that negative limitations, which do not appear in the specification as originally filed and, which introduce new concepts, violate the description requirement of 35 USC first paragraph. The specification does not mention the particular pharmaceutically active agents selected from immune stimulating agents, anti MDR agents. The specification does not mention the particular modes of administration.
